Goleta Water District - Recycled Water Hauling Program

Recycled Water Hauling Program Description

The Goleta Water District (District) is offering recycled water deliveries through the Recycled Water Hauling Program. Recycled water deliveries are restricted to landscape irrigation and construction purposes only. Recycled water cannot be delivered to a tank of any kind. The customer can decide to have recycled water delivered directly (1) by hose, or (2) by converting the existing irrigation system to allow for connection to the Recycled Water Truck (requires physical separation from potable system).

How Do I Participate?

- Step 1:** Complete, sign and submit this application to the Goleta Water District.
- Step 2:** District staff will contact you to schedule a “Pre-Inspection Site Visit” with the District’s Cross Control/Recycled Water Specialist. If your site qualifies, a copy of the application completed by District staff will be returned to you.
- Step 3:** Complete, sign and submit the Customer Agreement to the District.
- Step 4:** Submit deposit payment to the District per amount specified by Staff and in the Customer Agreement. The deposit will be calculated according to the following:
 Residential, Commercial, Institutional: amount equal to requested deliveries over two month period
 Construction: \$1,256.00
- Step 5:** After the Application, Pre-Inspection Site Visit, Customer Agreement and deposit are all completed and submitted to the District; staff will coordinate a delivery schedule with the customer.
- Step 6:** A delivery receipt will be given to the customer to confirm each delivery was made. A Billing Invoice will be issued to the customer monthly summarizing recycled water delivery charges for the billing period.

Recycled Water Rates

Rates: Customers will be charged a Commodity Rate, Zone Rate and a Water Application Rate:
