

LAKE CACHUMA WATER LEVEL

WINTER 2023 - 100%

FALL 2022 - 31%

Santa Barbara County has received **194% of normal rainfall** for the current water year. This above-average rainfall led to Lake Cachuma reaching **100% of capacity**. The District has received 100% of its Cachuma water supply allocation for the current year. The District will inject surplus water supplies into the Goleta Groundwater Basin to prepare for future water shortage emergencies and meet customer needs.
